

Stephen Bigelow

Curriculum Vitae

Department of Mathematics +1 805 893 3362
University of California bigelow@math.ucsb.edu
Santa Barbara CA93106, USA <http://www.math.ucsb.edu/~bigelow>

Employment

- 2000-2002: Research Fellow, University of Melbourne
- 2002-2007: Assistant Professor, University of California at Santa Barbara
- 2007-: Associate Professor, University of California at Santa Barbara

Education

- 1992: BSc(Hons)(First class), University of Melbourne, Australia
- 1994: MSc, University of Melbourne, Australia
- 2000: PhD., Mathematics, University of California at Berkeley
Advisor: Robion Kirby

Research Interests

- Braid groups and knot theory
- Representation theory
- Quantum topology

Teaching

- 1991: Volunteer tutor, University of Melbourne Summer School.
- 1993: Tutor at University of Melbourne, Australia.
- 1996-1999: Teaching Assistant at UC Berkeley, including work for the “Professional Development Program” for underrepresented groups.
- 2002: Lecturer at University of Melbourne. Set syllabus, homework, and grades for honours course in topology.
- 2002-: Course load of four courses per year at UCSB.

Awards

- 1993-1994: Australian Postgraduate Awards Scholarship
- 1995-2000: Fulbright Award
- 2000: Blumenthal Prize for outstanding thesis in pure mathematics
- 2001-2002: Australian Postdoctoral Research Fellowship
- 2002-2006: Sloan fellowship
- 2003-2006: NSF grant
- 2003: UCSB Junior Faculty Research Incentive Award
- 2013: Fellow of the AMS, Inaugural Class

Selected and recent conferences and talks

- 1994 Jan: Gruppentheorie (Permutationsgruppen) in Oberwolfach, “The truth about supplements of B_λ ”.

- 2000 August: KNOTS 2000 in Korea, “Does the Jones polynomial detect the unknot?”.
- 2002 August: International Congress of Mathematics, Geometric Topology satellite in Xian, “Braid groups and symmetric groups”.
- 2002 August: International Congress of Mathematics in Beijing, “Representations of braid groups”.
- 2011 March 21: Lazy Knots in Toronto, “An Alexander invariant of tangles”.
- 2011 March 26: Southern California Topology Conference at Claremont, “Algebras that count graph colorings”.
- 2013 April 10: Banff International Research Station, “Diagrammatic knot invariants that ought to be categorified”.
- 2013 October 26: DARPA and Shanks Workshop at Vanderbilt, “Diagrammatic quantum groups”.
- 2015 June 21-27: Mathematisches Forschungsinstitut Oberwolfach.

Selected and recent papers

- 1998: “Supplements of bounded permutation groups”, in the Journal of Symbolic Logic, 1998.
- 2000: “Braid groups are linear”, in the Journal of the American Mathematical Society, 2000.
- 2012: “A diagrammatic Alexander invariant of tangles”, in the Journal of Knot Theory and its Ramifications.
- 2012: “The Alexander and Jones polynomials through representations of rook algebras” in the Journal of Knot Theory and its Ramifications, with Eric Ramos and Ren Yi.
- 2012: “Constructing the extended Haagerup planar algebra” in Acta Mathematica, with Emily Peters, Scott Morrison, and Noah Snyder.
- 2014: “Principal graph stability and the jellyfish algorithm” in Mathematische Annalen, with David Penneys.
- 2014: “A diagrammatic definition of $U_q(\mathfrak{sl}_2)$ ” in the Journal of Knot Theory and its Ramifications.
- 2015: “Alexander representation of tangles” in Acta Mathematica Vietnamica, with Vincent Florens and Alessia Cattabriga.
- To appear: “The pop-switch planar algebra and the Jones-Wenzl idempotents” in the Journal of Knot Theory and its Ramifications, with Ellie Grano.
