Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

He is very helpful in explaining and is very willing to help if you have problems with the lessons or homework. Only thing I don't like is that sometimes he goes a little too fast through the lecture.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

I didn't like the book, it doesn't explain the chapters very well.
Mathematics Department – University of California, Santa Barbara

   Very prepared, organized, thorough, and welcomingly answers questions, explains everything in a way I can understand, great teacher.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.
   
   Pretty easy once I did it last year in high school but I had no trouble re-learning it with the help of Jordan.
Instructor: Scheffer  Course #: 34B  Quarter: Fall

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCE Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading.) Continue on back if necessary.

   - He is always prepared when presenting lectures and makes sure that the students understand the problems. He even works out the problems on the chalkboard making it easier for us to ask questions if we get stuck on a step. I loved the visual 3-D graphs and applets he would show us in class. He was not a boring teacher, and he was nice during office hours. He wants to see his students do well and that is reflected in his teaching, quizzes, homework, and tests. This class wasn't overwhelming, but I learned a lot. The teacher was great, I would probably want to take a higher math level with him and I don't like math.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   I wish Math 34B went more in detail like Calc 31B, just with simpler problems. Advice for students? Go to lecture and office hours, it helps 😊.
Instructor: J. Schettel    Course #: 31B    Quarter: F-2012

Please respond to questions A and B on the ESCL Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor’s teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

- really knowledgeable
- very approachable
- willing to help
- great in office hours
- helps to understand the "big picture"
- learned the most in this class than any other math course I've ever taken
- occasional tangents can be confusing

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

Content seems useful in major
good chalkboard
Instructor: J. Schettler  Course #: 348  Quarter: F-12

   Strengths: Talk very clearly
   Easy to understand
   Patient

   Weaknesses: Sometimes unorganized
   Should control time more wisely

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   The textbook is almost useless. It didn’t explain things clearly. It makes me confused all the time. Should change another textbook.

   **Very organized and detailed power points and explains problems by hand on board**.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   *Good as is.*
Mathematics Department – University of California, Santa Barbara

Instructor: Sudom Schetky  Course #:  Quarter: Fall 2012

Instructions: We are interested in your opinion of your instructor’s teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCL Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor’s teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

   Very clear and easy to follow

   Teaching method: Excellent!

2. Please comment on the course (for example, Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   Classroom was fine. Content was alright too.
Mathematics Department – University of California, Santa Barbara

Instructor: Jordan Schellter  Course #: Math 346  Quarter: F12

Instructions: We are interested in your opinion of your instructor’s teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor’s teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

Schellter is always prepared for lecture and even programs his slides for clarity instead of using PowerPoint. He teaches at a fairly slow pace, but that is the nature of the course, and it makes it easier to understand the material more in depth. He is always willing to answer questions and is sure to grade fairly. When he found out that most students had never heard of a concept, he pushed back the HW due date & did not count the grade for that quiz. A+.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

The class moves very slowly in the beginning and seems to move more quickly towards the end, but overall, goes at a slow enough pace to understand.
Mathematics Department – University of California, Santa Barbara

Instructor: [Name]  Course #: 341B  Quarter: Fall 2019

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. Continue on back if necessary.

   The teacher weaknesses are his tempo. He has a lot of material to cover and he may sometimes go fast. His strengths however, is his ability to explain himself to students, explain methods and techniques clearly in a way that is simple. Another one of his strengths is he is always willing to go over things. Even if it is unclear to just a few people. Sometimes if no one asks then he continues on with his fast tempo.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   The content is not too difficult, however there are some problems and sections I questioned on when we are ever going to use this. Either

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor’s teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

   Strengths: preparation and organization of lectures, willing to answer student questions, very helpful, genuinely cares about his students and their success in the class (rare!), stimulates interest

   Weaknesses: clarity (sometimes not as clear as he could be), homework deadlines (should probably not be posted back as much) homework (too little assigned, I think, and too some problems too simple), exams too much (I see practice tests by opinion)

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   Overall, decent course; level of difficulty depends on previous math experience + math knowledge aptitude
Instructor: Jordan Scudder  Course #: 241  Quarter: Fall 12

Please respond to questions A and B on the ESCL Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor’s teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

Jordan was great and available when ever needed. His teaching is a little fast and I feel like I am always just a step behind. He has a great attitude coming to class every morning and is very willing to help.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

This class is designed to be harder than it should be. The book is awful with zero examples. And I felt I had to teach myself half the content in the class. This class need improvement in teaching not just showing.)
Mathematics Department – University of California, Santa Barbara

Instructor: **Jordan Schetter** Course #: **Math** Quarter: **Fall 2012**

   - available & new
   - good lecturer
   - easy to understand

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   Math isn't my strong suit but Schetter made it easier to understand

   1) No weaknesses.

   2) Good teacher. I like the way he explains the material very clearly.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   Textbook was pointless. No examples in the book.
