SERVICE

- Co-organized six conferences and workshops over the past five years, on the subjects of subfactors, conformal field theory, and quantum field theory.
- Started the UC Santa Barbara seminar on quantum topology and quantum algebra, a research and learning seminar with significant interdisciplinary participation by graduate students from the mathematics, physics, and computer science departments.
- Served as a referee for many journals, including Duke Mathematical Journal, Advances in Mathematics, Proceedings of the National Academy of Sciences, Proceedings of the AMS, Reports on Mathematical Physics, AMS Contemporary Mathematics series, Journal of Differential Equations, Vietnam Journal of Mathematics, Operators and Matrices, and the American Mathematical Monthly.

TEACHING EXPERIENCE

- At UC Santa Barbara, I was the instructor of record for 11 quarter long courses, including Calculus II (5 times), Transition to Higher Mathematics (4 times), and upper division Linear Algebra (2 times). Course sizes range from 150-350 for calculus and 35-60 for proof based courses. On a scale of 1=excellent to 5=poor, my average course rating by students is 1.2.
- As a graduate student at UC Berkeley, I was the instructor of record for Matrix Theory and Differential Equations, and a teaching assistant for Calculus II, Precalculus, Matrix Theory, and Linear Algebra. I received an Outstanding Graduate Student Instructor award.
