I have included the complete evaluations from Math 100B, the second quarter of math for elementary teachers, which I taught as instructor of record. This course is part of the Teacher Education Program at UCSB, and the students were pre-service teachers in the Graduate School of Education.

The course was taught using inquiry based methods and was very intensive. This course was a 10 week course that was taught over the course of three weeks, meeting three hours a day. There were investigations, homework, readings from a textbook, observations, and videos. When you read students referring to “observations,” they are referring to when observed children working in elementary classrooms. There were also some video/CD’s of children learning math that they were required to watch both in class and as part of homework.
Mathematics Department – University of California, Santa Barbara

Instructor: Grace Kennedy Course #: Math 100 Quarter: Summer

Instructions: We are interested in your opinion of your instructor’s teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor’s teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

   Grace is a good instructor. She brings a passion for math that is contagious. She was well prepared and set clear expectations. This was an inquiry based course that called us to rely on one another to explain difficult points so it is difficult to assess her teaching. I think she asked good questions that led discussion.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   The content of this course was amazing. It was challenging. I learned so much. I got a lot more out of it than I had expected.
Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

- positive attitude
- always responds to questions quickly
- doesn't allocate time well
- rate of class take time sitting around because explanations didn't take 3 hours

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

- 45 hrs for an 3 unit class does not seem fair
- course doesn't seem very useful for a real classroom - a math methods course should be enough
Mathematics Department – University of California, Santa Barbara

Instructor: Grace Kennedy  Course #: Math 106  Quarter: Summer 12

Instructions: We are interested in your opinion of your instructor’s teaching. This information will be used by the faculty and campus administration in evaluating your instructor. Continue on back if necessary.

→ Grace’s teaching ability improved during the course

→ She really cared and helped a stimulating interest in math

→ She was very quick responding to emails, office hours etc.

→ She kept us over the time a lot I suggest she does not go over 11am in the future it just upsets us & we lose focus anyway

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

→ The coursework was heavy for only a 3 unit class

→ We barely used the textbook, I wish we discussed it more

→ Grading was good

Continue on back if necessary.

   Grace was a good instructor and clearly cared about the course and her students. I appreciated the work she put in to make the course worthwhile and successful. The only suggestion I would give her is to not rush lectures and discussions at the end of the class time and to avoid going over time because students will stop listening.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   I found this course incredibly helpful but it was very demanding and time consuming than a 3 unit pass/no pass class.
