Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on the back if necessary.

   Every lecture, Professor Scharlemann clearly explains each math topic that he will be going through. He also pointed out a lot of interesting facts about Math.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take it, etc.). Continue on the back if necessary.

   The course material is rather difficult. The textbook is also small and short, it does not explain a lot.
Mathematics Department - University of California, Santa Barbara

Continue on the back if necessary.

   His teaching wasn't bad at all. His strengths were great explanation of the material. But that was also a weakness for him. He wrote great examples on the board and it is hard to follow his quick explanations while writing down what is on the board because you want to write down and listen. He was very willing to answer questions and did so clearly. HW and exams were somewhat fair. Mostly it was the HW that was fair. The exams sometimes had material that wasn't what we had seen before.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take it, etc.). Continue on the back if necessary.

Continue on the back if necessary.
   
   He was a great teacher. Made advanced concepts seem really easy and was very approachable. Very few weaknesses he's obviously an experienced teacher. Some of the exam questions were fairly hard, although it was cool that we got to choose which...

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take it, etc.). Continue on the back if necessary.

   The course seemed more of an overview of matheamtics and less of an introduction to proofs. Overall not too bad, but since the record midterm seemed to have no problems that were on hour's didn't like the book, it didn't seem to help mathematical notation...
Instructor: Martin Scharlemann  
Course: Math 8
