Instructor: **Scharlemann**  Course #: **Math 6**  Quarter: **W12**

**Instructions:** We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. *Please write in pen.*

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

   Prof. Scharlemann is very consistent with his teaching and is able to communicate well with his students. He kept the lectures interesting and his tests were very fair as long as you prepped.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   Book is alright, could be easier to understand. Our TA did examples in section that were totally unnecessary to our success in the class - they were way too much for our heads.
Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

   He was clear on teaching the course material. His explanations of the proofs and theorems in the class were really good. I enjoyed his teaching style.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   The textbook was not good. The content was hard to comprehend at times.
Mathematics Department – University of California, Santa Barbara

Instructor: Scharlemann Course #: Math 8 Quarter: W 12

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

   One of the few good math teachers that exist in UCSB. His lectures were entertaining and he never made the mistake of assuming everyone just knew something. He engaged his students and did a good job in sparking interest in an otherwise boring subject.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   Content was a little on the easy side but it's hard to gauge because we all have different levels of math background. Book enjoyed the book, and appreciated the smaller class room size. My only suggestion is to buy more railroad chalk.
Mathematics Department – University of California, Santa Barbara

Instructor: PROF. SCHLUMANN  Course #: 8  Quarter: W12

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

   PROF. SCHLUMANN IS PRETTY GOOD. IT SEEMS UNFAIR THAT HE ASKS OBVIOUS QUESTIONS AND THEN ASSUMES NO ONE KNOWS IF NO ONE ANSWERS. I ALSO DON'T LIKE THE POP QUIZZES, HOWEVER EASY THEY MAY BE – WE SHOULD BE ABLE TO MISS 1 or 2 WITHOUT AFFECTING OUR GRADE

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   A LOT OF THE MATERIAL I HAVE SEEN BEFORE SO I FEEL LIKE MUCH OF MY TIME IN THIS CLASS IS WASTED. IT WOULD BE NICE IF THERE WERE OPTIONS FOR SUCH SITUATIONS
Mathematics Department - University of California, Santa Barbara

Instructor: Martin Schramm \hspace{1cm} Course #: Math 9 \hspace{1cm} Quarter: Spring

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

   Very Poor \hspace{1cm} Fair \hspace{1cm} Good \hspace{1cm} Excellent
   I believe the students usually pass the class.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   Very Instructive \hspace{1cm} Almost Always go to Office Hours
   I believe that this is one of the most difficult classes to understand.
   Maybe other professors prepare student notes which make attention for upcoming courses a student might take.

While taking $3x - 2y = 5$, the professor mentioned what they might see for more success if they went into Math 9.
Mathematics Department – University of California, Santa Barbara

Instructor: Schueleman  Course #: Math 8  Quarter: W 12

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

   - Came prepared to lecture. Definitely had student involvement by randomly asking a question and picking a student so this made the class pay attention. Good attendance in class because he gave out quizzes. Possibly needs to assign more problems to the homework for extra practice. Exams were fair, everything on them was covered by professor. Schueleman is also funny. Made lectures fun in a way.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   - Difficult course, but definitely prepares you for the coming upper division math courses.
Mathematics Department – University of California, Santa Barbara

Instructor: Schurleman Course #: Math 8 Quarter: W 12

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

   His greatest strength is his voice. He has a voice meant for radio. It's deep enough to be comforting but not so deep as to be boring. I see no weakness in this lesson.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   The course is not too difficult. It just takes some getting used to because it was different from calculus.
Mathematics Department – University of California, Santa Barbara

Instructor: Martin Schickmann  Course #: Math 8  Quarter: W/2

Instructions: We are interested in your opinion of your instructor’s teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor’s teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

   The presentation and organization of information is very good. Things are presented clearly and in a detailed straightforward manner. However, lectures aren’t very engaging/stimulating. Everything else is fairly good in regards to the instructor and the course.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   I found this course very easy and the content rather dull. The textbook is good. Room is in good condition, etc. 
Mathematics Department – University of California, Santa Barbara

Instructor: Martin Schelemann  Course #: Math 8  Quarter: Winter 2012

Instructions: We are interested in your opinion of your instructor’s teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor’s teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

   He is well prepared for every lecture. Though the content could be boring sometimes, he still tried to make it as entertaining as possible. Homework and exams are easy as long as you do your work by yourself. However, as I mentioned, the content is not as interesting as it could be.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   Textbook and homework is fairly decent in my opinion. Homework is pretty easy if you take the time. Exams are easier than homework.
Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

   Great teacher, but instead of just writing prep on the board, I think he should include the proposition number. Always prepared well for class and gave enough time for students to ask questions. The tests were fair, not too hard.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary. The course is challenging, but it is preparation needed for upper division math courses.
Instructor: Schneemann  Course #: Math 8  Quarter: Winter 2013

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. 1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

He was always prepared for lecture; he is very approachable, his writing is most of the time legible, and his teaching was great. I extremely liked that he broke down difficult concepts to the most basic form. He is great with everyone, and would answer whatever question we had. Also it seemed like everyone liked his jokes so keep at it because helps us to stay awake.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

Students should read the book.
Mathematics Department - University of California, Santa Barbara

Instructor: Scharlemann Course #: MATH 8 Quarter: Winter

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

   Great teacher, great attitude towards student, very helpful, answered questions during office hours, always prepared and clear.

   10/10

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   Course is more difficult, concepts are harder than usual to understand. If you take this class be sure to be on it from Day 1 - Last Day.
Mathematics Department – University of California, Santa Barbara

Instructor: Schaefermann  Course #:  Quarter: W. '12

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading.) Continue on back if necessary.

   Great instructor and straightforward with all the material but sometimes we need a little more explanation and in the book, the homework does not completely match what happens in the class. More explanation as in what happens in the case of a more complicated problem. Examples in class are really easy.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   Straightforward but some concept needs to group knowledge understood, your lost.
Mathematics Department – University of California, Santa Barbara

Instructor: Schäfermann  Course #: Math 5  Quarter: W '12

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

   I feel the professor was prepared for class, daily. He presented many examples, albeit many came from the book. My only issue would be that our topics seemed to jump all over the book and wasn't necessarily linear.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   The course itself was an informative, good intro to higher mathematics. The book was very useful, except that on some chapters the author did not feel obliged to explain some proofs or conclusions. Room and board were adequate
Mathematics Department – University of California, Santa Barbara

Instructor: Scharlemann Course #: Math 8 Quarter: Winter 2012

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

   Instructor Scharlemann is a very good professor who knows the material of the course very well. He is very helpful when something is not understood and he wants every student to not only do well in the course, but gain a better understanding of the concepts that are used in every kind of math.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   The course is fairly difficult. The textbook is easy to follow but the homework problems at the end of each chapter are much more difficult than the lessons provided in each chapter. Exams are also fair, no trick questions.
Mathematics Department – University of California, Santa Barbara

Instructor: Schlemm [Name]  Course #: Math 8  Quarter: Winter 2023

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

   He is a good teacher, very easy to listen to. I wish some of the examples in class were more difficult because the homework was almost always harder than the lecture examples. Tests were difficult but fair usually 5 problems pick 4. That was very nice.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   The course was OK. Next time you remodel a room, please don't just remove the clock. The book wasn't consistently helpful often it didn't have examples or information to help with the homework questions.
Mathematics Department – University of California, Santa Barbara

   VERY ORGANIZED AND PROFESSIONAL.
   FRIENDLY ATTITUDE IN CLASS AND IN OFFICE HOURS.
   GLAD HE WAS SO ENTHUSIASTIC DESPITE THE
   LISTLESS GROUP OF KIDS HE WAS TRYING TO ROUS.
   I'LL WANT HIM AGAIN FOR OTHER MATH COURSES.
   REALLY LIKED HIM!

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

   COURSE MATERIAL WAS FINE, ROOM
   WAS GREAT.
   BUT SERIOUSLY, WHAT THE HELL IS UP
   WITH THE MANDATORY TWO SECTION
   ATTENDANCE? THERE'S NO WAY THAT PENALIZING
   KIDS FOR NOT SHOWING UP TWICE A WEEK IS
   HELPFUL. THE SECTIONS OUGHT TO BE AUXILIARY
   ASSISTANCE, NOT MANDATED THE WAY THEY ARE.
   ... BUT I STILL LIKE THE CLASS!
Mathematics Department – University of California, Santa Barbara

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

very prepared, good job

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

not sure why 5 units, not that hard, but not complaining. useful material.
