Geometry, Topology, and Physics Seminar

Introduction to K3 surfaces

David R. Morrison
UCSB

Friday, September 30, 2016, 4:00 p.m.
Room 6635 South Hall

Abstract: K3 surfaces have played an important role in algebrac geometry, complex analytic geometry, and differential geometry for the past 60 years. They also have important applications to physics. I will give a series of lectures this fall on K3 surfaces, of which this is the first.
