

Mathematics Department – University of California, Santa Barbara

Instructor: SCHAELEMANN Course #: MATH B Quarter: F 2008

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

CHALLENGING BUT GOOD INSTRUCTOR.

Office Hours v. HELPFUL, CLEAR +
EASY TO UNDERSTAND. (LECTURES
SIM. TO TEXT, BUT STILL V. HELPFUL)

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

TEXT IS GOOD.

ADVICE: DO ALL YOUR HOMEWORK !!!
(AND DO PROBLEMS ON THE BOARD)

Mathematics Department – University of California, Santa Barbara

Instructor: Scharlemann Course #: 8 Quarter: Fall '08

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

Overall good teacher, sometimes feels like he's talking down to the class if there is something not understood by the class.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

Class is confusing and difficult

Mathematics Department – University of California, Santa Barbara

Instructor: Scharlemann Course #: 8 Quarter: Fall 08

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

Strengths
- Clarity of speech
- use of examples

Weaknesses
- Have no idea what I'm voting on usually

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

- Good course
- Fairly difficult
- Beginning harder than end

Mathematics Department – University of California, Santa Barbara

Instructor: Mathis S. ... Course #: Math 8 Quarter: Fall 08

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. These surveys must be filled out and collected in class and returned directly to the department office by a student. Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

I like that the instructor explained every subject pretty well, did a lot of examples, and went at a slow pace (the material is not easy). Also, he was friendly and joked a lot. Not really any weaknesses, but the grading was strict but that was OK.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

The course is very difficult, hard to understand. Classroom was in good shape.

Strengths:

- Well prepared for lecture
- Willingness to answer students questions (always asked if there were any)

Weaknesses:

- A bit intimidating with answers

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

Very difficult class such that there's no CLAS for it.

Continue on back if necessary.

Because of the concepts introduced were relatively new to me I had a tough time understanding lecture or main concepts, however, Scharlemann has a very high teaching strength that allowed me to progressively over time to start understanding. He was very positive yet provocative, always, challenging and stimulating students to think differently. He explained things well and for the most part very clear in lectures.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary

It was hard, but interesting.

Mathematics Department – University of California, Santa Barbara

Instructor: Scharlemann Course #: 8 Quarter: fall 2008

Professor Scharlemann is an excellent lecturer for Math 8. Always prepared, willing and able to answer questions, with good board craft. And his use of humour keeps the class interesting.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

I think most of the students' problems came from a lack of foundation in logic statement construction. Perhaps spending a day on truth tables would help.

Mathematics Department – University of California, Santa Barbara

Instructor: Scharlemann Course #: Math 8 Quarter: Fall 08

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

He does not stimulate my interest in this course because he bases all his notes out of the book. Not very fair in grading, even though we are given a week, the materials are very heavy and hard to comprehend so the way the how unfair they are graded. Over all has a good teacher but need some changes in grading and curves the grades which is awesome.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

The materials are heavy and hard to comprehend. They are all proofs and the room doesn't have a chalk board. please change the room for the next course.

Mathematics Department – University of California, Santa Barbara

Instructor: Scharlemann Course #: Math 8 Quarter: Fall '08

Instructions: We are interested in your opinion of your instructor's teaching. This information will be used by the faculty and campus administration in evaluating your instructor. Continue on back if necessary.

Prof Scharleman is well prepared each day and organized. He does have a tendency towards writing with out pause and I have trouble keeping up in notes and hearing what he says and comprehending the next thing as I write the last. He is reasonable in questions most the time but not always. His attitude did startle me once when he expressed wanting to be able to automatically fail students he didn't regularly see in class - just upsetting to hear an undertone of bitterness I suppose.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

I find this course very difficult indeed. The math lab is usually at a loss to help and the TA as well sometimes falls "short" (and is also hard to understand with such a thick accent)

These surveys must be filled out and collected in class and returned directly to the department office by a student. The data from these surveys will be available to the instructor only after grades have been submitted to the Office of the Registrar. Please do not write your name on this form. Please write in pen.

Please respond to questions A and B on the ESCI Faculty/Course Response Form before continuing on with this questionnaire.

1. Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

Professor Scharlemann's ~~are~~ lectures are extremely engaging and although the course itself is quite rigorous, he does an especially great job of simplifying the material during class. His lectures follow the book quite ~~and~~ nicely and he is always prepared to teach for the entirety of each class. The only complaint I have is that he is not very helpful during his office hours (with homework, etc), although the TA was excellent.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

This is by far the most difficult Math course I have ever taken, but also the most interesting.

Teacher was good in getting the attention of his students through the use of humor and raising his voice on important concepts.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

This is a course that is difficult to understand if you have not taken any classes on proofs, yet it is very interesting material.

- 1 Please comment on the instructor's teaching strengths and weaknesses. (For example, you may wish to comment on preparation and organization of lectures, boardwork, clarity of presentation, ability to stimulate interest in the subject, ability to explain difficult points, willingness to answer questions, attitude toward students, availability and helpfulness of office hours, homework, fairness of exams and grading). Continue on back if necessary.

Excellent instructor, some analogies may not be the best, but that is a minor complaint and its hard to imagine better ones anyway.

- 2 Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

I love courses like this, they are the reason I came to college.

I only wish there was time to cover more material.

The professor is good. He has the ability to convey the lesson thoroughly.

2. Please comment on the course (for example: Content, level of difficulty, textbook, physical conditions of the room and chalk or white boards, suggestions for improvement, advice to students who might take this class, etc.) Continue on back if necessary.

The book is written very well. The course is fair however the grader doesn't seem to grade on the basis of fairness. Such proofs must be written in words but proofs are different from one another.
